

What happens when A Villager Has Dreams?

I was born in the bush country of beautiful Tanzania in the village of Namtumbo. As the fifth born of eight children, my mother and father never had much, but even living in what others would consider poverty, I was rich. My father strived to give each of us an inheritance that would change our lives: an education. We worked tirelessly growing crops and tending to our animals to receive our inheritance for each of us. Born in the small village of Namtumbo, Tanzania, and moving to Spain for further education, I found my purpose. After graduating, I pursued teaching as a full-time career because that is how you can influence someone and make others' lives better. Having leadership and relationship building skills, I soon found that my students lacked in spiritual and personal development. It motivated me to help them overcome these issues.

My debut book, "Grow Your Rich Gene" explains that growth is inevitable and endless. This book is a perfect guide if someone wants to transform into a better version of themselves. "Grow Your Rich Gene", isn't only for individuals but also for companies who are stuck in their stagnant growth because of focusing on daily operations and not finding the time to work on the longer-term strategic goals.

Being on a mission to help you break that cycle of poverty and self-limiting beliefs, I strongly believe that you don't have to have a clear mind from the very start. You need to have an open mind to adjust and adapt to the things important for your personal development. My constant collaboration to derive personalized strategies for you will be sufficient to bring out the best in you.

There are a few things in the World that cannot be planned, but worked upon. Your growth is one of them!

Let's become the best version of ourselves so we can help others to become what they truly deserve.
